Ban on Amateur Radio

- February 24, 2022: Decree from President Volodymyr Zelensky included “a ban on the operation of amateur radio transmitters for personal and collective use.”
- A month later the regulation has been shifted from the country level to the oblast'
- As of March 15, 2023 - still banned in Donetsk, Lugansk, Kherson, Krym (4 of 25 total)
- “Any radio amateur currently transmitting from Ukraine is risking his or her life. If you hear a Ukrainian station, do not broadcast its callsign, location or frequency — whether on the band, in a cluster or on social media. You may be putting lives at risk.” (IARU - Region 1)

Is it Difficult to Operate?

- Towers and antennas had to be disassembled/put down
- Risk of looting or violence
- Can be considered as combatant or artillery spotter
- Widespread power outages

Is it Dangerous?

- Sergei UX1UA (UV5U)
- RigExpert - one of the founders
- President of Kiev DX and Contest Club
- 460K QSO in the log
- QTH: Gostomel, near Kyiv

Is it Dangerous?

Amateurs Do Their Part

- Donate their skills and equipment to the ZSU and Territorial Defense
- Intercept enemy's communications, DQRM bombers nets, provide intel information, spotting
- Establish communications, help in rescue efforts after enemy strikes
- Support ZSU and TD in electronic warfare, drones interception, encrypted comms
- Send the message to the world

Amateurs Do Their Part

1 year later. War of Attrition

- Still dangerous. Air raids, missiles, kamikaze drones, artillery shelling every day
- Most Ukrainian hams cannot go on air or leave the country to visit exhibitions and participate in contests due to the martial law in the country
- Many famous amateur radio stations are blown up
- Many amateurs are fighting or lost their lives
- Ukraine will participate in WRTC Italy 2022 (see Yuri VE3DZ remark)
